

Rad Rides By Troy 1956 Chrysler 300

Troy Trepanier has wanted to build a 1956 Chrysler 300 for a long time, and now the time has come. Taking inspiration from the Sniper project of 1996, this Chrysler will also have a Viper suspension, but that's where the similarities end. The engine will be a twin-turbo Nextel Cup Dodge motor, the frame is all pieced together from individual sections of .090" Chrome Moly steel sheet (!) and the outside will retain an original '56 appearance. It's going to be subtle like a sledge to the head.
