

Pro-Touring 1970 GTO

Andrew Borodin's 1970 Pontiac GTO has been around the block a few times, and keeps picking up new tricks at every turn. This time, Andrew ditched the previous mill - a Big Block Chevy - in exchange for a new-tech, lightweight, all aluminum GM L92 6.2 liter V8. The GTO rolls on a trick - but simple - suspension that sticks in the turns and features Corvette brakes. After adding a few goodies like Corvette accessories and intake manifold, he jammed in an LS7 camshaft and now the Goat runs 12's, goes around corners like crazy, and still racks up 23 MPG. Watch the video to learn how.. and to see it on the drag strip and the autocross!
